

Bradley University Tunnel Support Resolution

Whereas, Bradley University is a university of national distinction; and,

Whereas, Bradley University has been involved with a great number of complaints, safety concerns and the amount of traffic between the University and St. James is of reasonably large amount,

We believe, as the representatives of the student body, that the University should build a tunnel or bridge between the north and south corners of Bradley Avenue and University Street. This tunnel, or bridge, would be for all students to use. It would greatly increase the safety of the students who cross there.

This resolution will be presented before University Senate and the President's Office.
