

# Secure Wireless Networking

 "Aeris" 

**COMING TO BRADLEY**

**MONDAY, June 27, 2005**

- You **MUST** have secure wireless (802.1x) enabled on your computer in order to use the wireless network.
- Instructions for setting up 802.1x, system requirements, and other important information located at:

<http://www.bradley.edu/irt/projects/secure/>

**IMPORTANT!!!!** Starting Monday, the network names (SSIDs) previously used to access the wireless network (library, morair, etc.) will no longer work.

**NOTE:** *If you do not have a current operating system or do not have 802.1x set up when secure wireless is turned on, you will be required to use the new "Unsecure" network zone (SSID "Unsecure") and register your computer on the network.*

**Call the Technology HelpDesk at x2964 if you need help.**
