Disable Spam Inspector Junk E-mail Filter

Barracuda Spam Filter is most effective when junk mail filters and rules of other programs have been disabled or removed. By doing this, we can avoid a potential mix-up between quarantine folders and makes it easy knowing quarantined mail is directed to a single source.

Spam Inspector

Removing Spam Inspector from your computer will reduce potential errors and loss of email messages.

Uninstall Spam Inspector using the Add/Remove Programs applet from the Control Panel

Quit and exit Microsoft Outlook before proceeding.

1. Start/ Control Panel/ Add or Remove Programs
2. Select Spam Inspector from the list, click Remove
3. The InstallShield Wizard will begin, choose Remove from the list and follow the prompts.
